

R709 Content on Mac OS Setup

Loudness Films

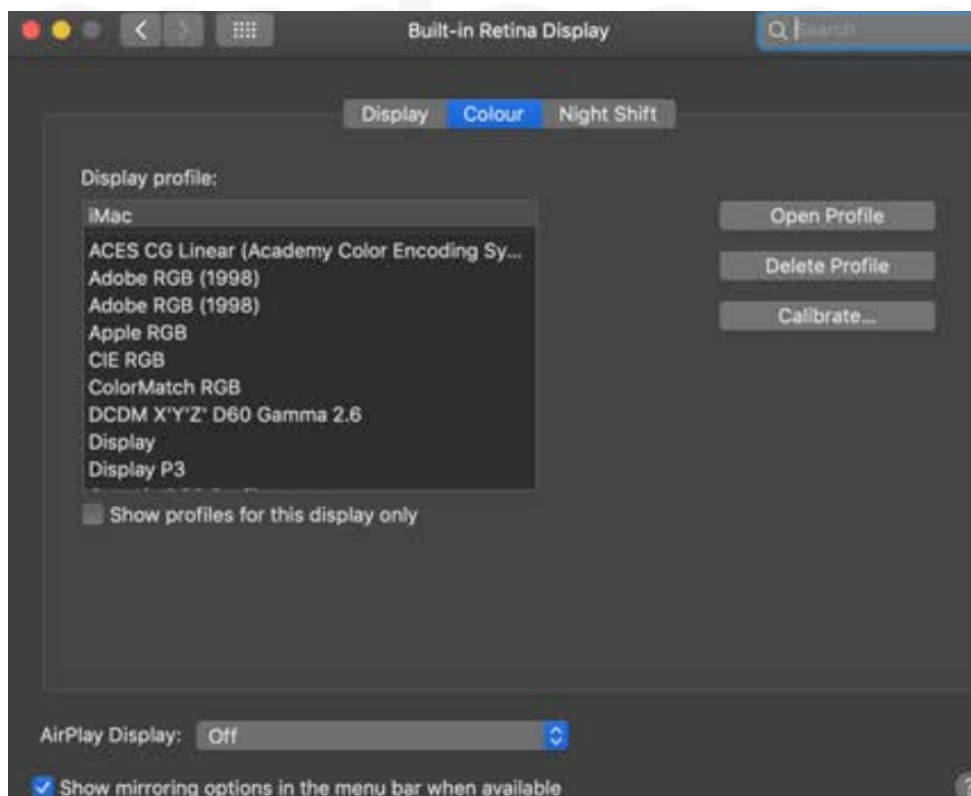

version 1.0
february 2023

How to watch Rec709 content on Quicktime Player for Mac Creative Reviews

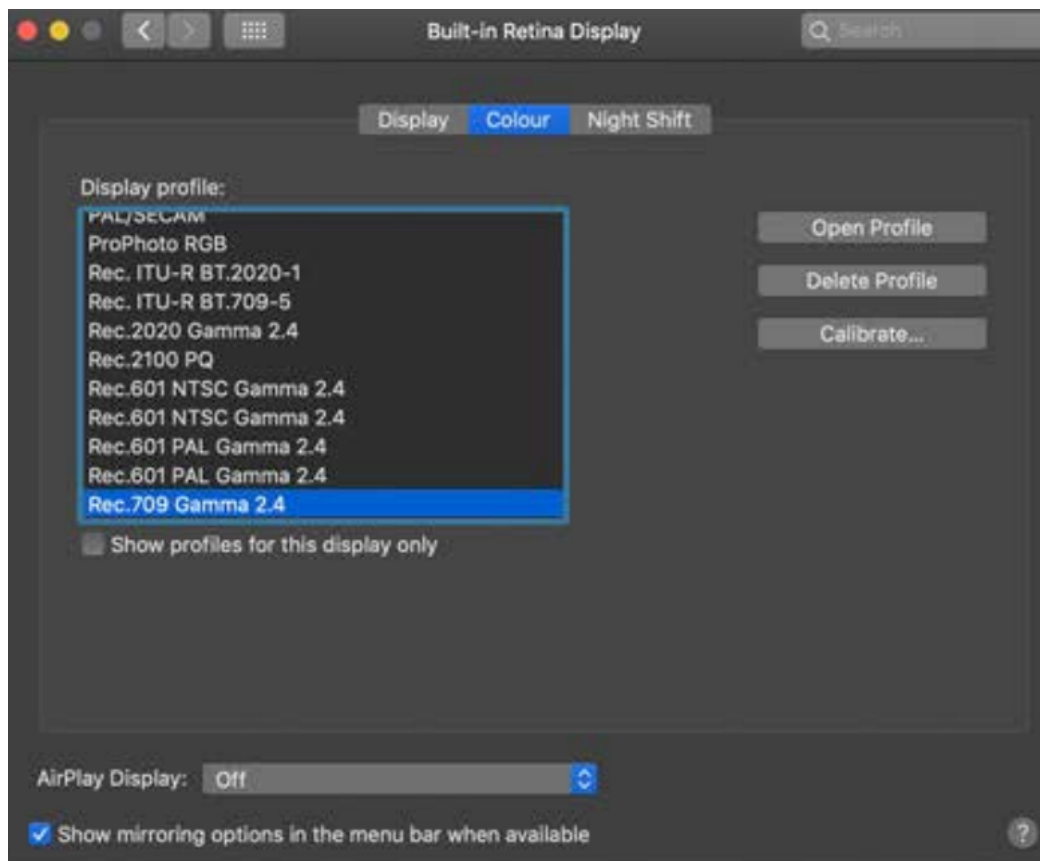

1. Under “System Preferences” select “Displays”

2. Click the “Colour” tab

3. Under “Display profile:” select **Rec.709 Gamma 2.4**

After you watched the content you can then switch back to the default profile

If you don't have the profile installed please install via this link
